

2026–27 Sponsorship Prospectus

Who We Are

- As the largest machine learning club on campus, our mission is to grow and develop a community of students interested in Artificial Intelligence (AI) at UCLA, Los Angeles, and beyond. Our initiatives aim to make AI/ML accessible, to serve everyone who has an interest in AI regardless of background, including people with no prior experience, non-CS majors, and underrepresented groups through our weekly workshops, projects, events, and outreach programs.

What We Do

- Projects
 - Lead AI-focused projects for ~75 undergraduate students. Open to highly technical members led by project officers. Building novel projects such as Prediction Market Modelling, RTS Bots, ML competitions, and other things such as Twitch Emote Prediction, RNA folding etc.
- Workshops
 - Teach weekly machine learning workshops to 250+ undergraduate students at UCLA. These are open to everyone, no experience required, with Capstone and Research track, focusing on applied AI projects to develop technical skill and preparing students to join industry and ML research labs.
- AI Hackathon / Mini ML Challenge
 - A one day, 4 hour coding sprint where participants train their own machine learning model to solve a pressing societal issue, similar to a Kaggle competition. Beginner and Advanced tracks are offered to accommodate every skill level. Guest speakers and workshops are held to increase technical development. Historically 100+ attendees for our flagship event.
- Outreach Classes at GALA Girls Academic Leadership Academy
 - GALA is the first and only all-girls public 6–12 STEM school in LAUSD and California. We seek to decrease the gender gap in AI/ML and teach foundational concepts with hands-on activities to this class of 60 students, making AI more accessible.

Sponsorship Tiers

Bronze – \$1000

- We will put your name and logo on our website, and announce your company's sponsorship at each quarter's general meeting
- Regularly announce internship and full-time position from your company

Silver – \$1500

- All benefits of Bronze + we will put your company logo on our Shirts and hoodies, which is worn by 250+ club members

Gold – \$2500 [UCLA CS AFFILIATES ONLY]

- All benefits of Bronze and Silver
- Ability to recruit in all virtual and in-person events

Why Support Us?

Your sponsorship directly enables impactful learning experiences and expands access to AI education:

- Purchasing cloud and local compute and server resources to power our projects
- Prizes for winners of our annual MiniML Challenge
- Transportation for our officers to and from the school weekly to local High schools for outreach.
